

Christian Gealone

AI AUTOMATION SPECIALIST · ENTERPRISE SOFTWARE DEVELOPER

Philippines

✉ christian.gealone1@gmail.com 🏠 https://xtian-2000.github.io/work_portfolio/ 🗣️ xtian-2000 🌐 Christian Gealone

Summary

- AI automation specialist and enterprise software developer with hands-on experience building n8n workflows, Claude API integrations, and Telegram/Mattermost bots for business operations.
- iDempiere ERP developer skilled in PostgreSQL, server administration, and multi-tenant system configuration across production environments.
- Computer Science graduate bridging low-level infrastructure (Linux, Nginx, Jetty) with high-level AI tooling (LLM intent routing, automated reporting, ERP data pipelines).

Experience

Independent ERP & AI Automation Consultant

Remote

SELF-EMPLOYED

2026 - Present

- Implemented and customized iDempiere ERP for business clients, covering configuration, server administration, and multi-environment deployments.
- Built AI-powered automation workflows using n8n, integrating LLM intent routing, Telegram/Mattermost bots, and live ERP data pipelines.
- Designed and delivered custom business reports using Jaspersoft and PostgreSQL to support operational decision-making.
- Contributed to startup strategy: proposed product ideas, evaluated and recommended platforms and third-party tools, and advised on emerging technologies.

ERP Developer

Hybrid

RAMPIERE IT SOLUTIONS INC.

2022 - 2026

- Developed and maintained ERP system features for business clients using iDempiere.
- Worked directly with business stakeholders to translate operational requirements into software solutions.
- Built custom reports and data pipelines (Jaspersoft, Talend ETL, PostgreSQL) supporting business decision-making.

Projects

Rampiere n8n Automation

Corporate Project

DEVELOPER

[VIEW SCREENSHOT](#)

2026

- Built an internal AI assistant on Mattermost using n8n and Claude, routing natural language commands to business workflows (payslip comparison, workday validation, time sheet review).
- Implemented LLM-based intent parsing to classify user messages and trigger the correct sub-workflow automatically.
- Designed interactive button-based flows for client and employee selection when parameters are not specified in the message.

M&H Food Corporation n8n Automation

Corporate Project

DEVELOPER

[VIEW SCREENSHOT](#)

2026

- Built a Telegram bot (MH Assistant) connected to live iDempiere ERP data, enabling staff to query branch status, employee attendance, and unreported requisitions via chat.
- Implemented branch-level access control so each user only sees data for their permitted branches.
- Delivered paginated attendance reports with automatic PDF fallback for large result sets, using PostgreSQL queries on production ERP data.

Paypiere — Payroll Software

Corporate Project

BACKEND DEVELOPER

[VIEW SCREENSHOT](#)

May 2025 - Present

- Implemented backend logic for payroll processing software used by multiple companies.
- Contributed to the design of Flexible, Semi-Flexible, and Fixed Time sheet workflows.

M&H Food Corporation — iDempiere ERP

Corporate Project

ERP DEVELOPER & SYSTEM ADMINISTRATOR

[VIEW SCREENSHOT](#)

2022 - Present

- Maintained and extended iDempiere ERP plugins to support evolving business requirements.
- Diagnosed and resolved system issues across application and database layers.
- Performed server administration including ERP version upgrades (v11 → v13).
- Designed and delivered Jasper Report templates for operational and financial reporting needs.

Heujier Sales Script Mobile App

Personal Project

DEVELOPER

[VIEW SCREENSHOT](#)

2021

- Identified a workflow problem: sales scripts were too long to navigate on mobile while handling Instagram customer inquiries.
- Built a mobile app that organizes scripts by category; tapping a script copies it to clipboard instantly for pasting into Instagram chats.
- Eliminated the need to switch to a computer for script lookups, enabling faster customer response times on mobile.

Skills

AI & Automation

n8n Workflow Automation, LLM Intent Routing, Claude API, Telegram & Mattermost Bots, ERP Data Pipelines

ERP & Reporting

iDempiere ERP, Jaspersoft Reports, Plugin Development, Talend ETL, Server Administration

Technical

PostgreSQL, Java, Python, Linux, Git

Spoken Languages

English, Filipino

Certificates

Google AI Certificate Suite

Google

6 CERTIFICATES

Jun 2026

- AI Fundamentals (C53TW3BKLCG1)
- Google AI Essentials (1AIIKD5LYJBj)
- AI for Brainstorming and Planning (FT4UEES17RMH)
- Use AI Responsibly (KB4ZDQXV9PW0)

Hackathon Champion

Emilio Aguinaldo College

CERTIFICATE OF PARTICIPATION

[VIEW CERTIFICATE](#)

Nov 2021

- Won 1st place solo under the name PONGODEV in the college hackathon on November 19, 2021, competing against team entries.

Education

Emilio Aguinaldo College

Dasmarinas, Cavite

B.S. IN COMPUTER SCIENCE

2018 - 2022

- Coursework spanned software engineering, database systems, and systems architecture — the foundation now applied daily to ERP and automation development.
